

Improve Farm Safety: Reduce Noise

Protect workers | Improve communication | Reduce injuries

A practical approach to improve safety without disrupting operations

WHAT'S THE PROBLEM?

- Farm machinery and equipment can be **hazardously loud**
- Noise affects **communication** and **situational awareness**
- Hearing loss is **common** and **often overlooked**
- **Simple steps** can reduce risk

WHAT ARE WE PROPOSING?

We are offering a low-burden approach that fits into existing workflows

- Short, practical safety messaging (can align with existing trainings)
- Hearing protection provided to workers
- No cost to growers, managers, or workers

WHAT THIS LOOKS LIKE ON YOUR FARM

- Fits within your existing workflow
- No interruption to normal operations
- Flexible scheduling based on your availability
- Can be incorporated into existing safety talks

PARTICIPATING GROWERS RECEIVE

- Free hearing protection for workers
- Brief on-site noise assessment (optional)
- Clear, practical recommendations
- Cash incentives available
