

Protected Ears Project

Join our efforts and **be a leader** in hearing health!

Who are we?

A group at SDSU led by Dr. Laura Coco. **Our goal** is to reduce risks of noise exposure and hearing loss in agriculture.

What do we do?

We perform *free* hearing tests, sound surveys, and strategize with you about how to minimize noise exposure on your farm.

Why is this important?

Excessive noise causes stress, fatigue, and disabling hearing loss, which is linked to depression, isolation, and communication problems, as well as a higher risk of injuries on the farm.

Reach out for more information!
No cost.
This is a service of SDSU.

Once your hearing is gone, you cannot get it back.
Noise exposure is **100% preventable** with simple strategies. Let us help!
